Our history

Founding of LaCruz

Year of foundation of the sole proprietorship, born as a secondary activity of Andrea Cruzzolin, who at the time was the owner of a technical studio specialized in the analysis and design of plastic injection and die-casting moulds.

In the same year, thanks to the development of the trellis clip and the consequent filing of the patent, Andrea Cruzzolin was awarded the "Innovation Award of Veneto".

The first international fair

The commercial momentum and positive feedback from the articles designed, produced, and marketed provided the right entrepreneurial push to participate for the first time in one of the most important trade fairs in the world for viticulture, the Sitevi in Montpellier, France.

Company growth and new headquarters

LaCruz doubles its sales year over year, transitioning into an S.r.l. (limited company) with €1.2 million in revenue.

That same year, it moves operations to a 650 m² facility in Oderzo (TV), including offices and warehouse.

LaCruz becomes registered trademark

The progressive exponential growth requires further expansion and a consequent reorganization of the logistics area into a 200 m² space, entirely dedicated to the warehouse.

To emphasize the company's internal design and manufacturing at an international level, LaCruz® becomes a registered trademark, ensuring that its products are easily identifiable in the market.

The patents

LaCruz's manufacturing and trading activities lead to the development and production of the first spare parts compatible with various grape harvesting machines.

Patents are filed for the shaking rod and catcher trays compatible with Gregoire grape harvesters.

New patents

Ongoing development leads to the patent of a shaker compatible with Pellenc harvesters and the creation of the corresponding mould.

New spaces and new innovations

Rapid growth requires expansion, adding another 650 m² (totaling 1,300 m²) and creating a workshop area. Revenue rises to €1.8 million with a team of 5 employees.

LaCruz

The benchmark in viticulture

Founded in 2006 by Andrea Cruzzolin, LaCruz has long been a leading name in viticulture.

An enterprise rooted in experience and innovation, located in a region deeply embedded in wine culture. Continuous improvement, combined with technological, mechanical, and material knowledge, underpins the development of efficient products for the sector and its users.

LaCruz offers a wide range of products: spare parts, accessories for harvesting, tying, trimming, battery sales, electric pruners, and sale and servicing of harvesters.

LaCruz compatible spare parts-known for high quality and

competitive prices-represent a solid alternative to OEM parts.

Speed and availability are not only customer demands but also core values of the company's service model, crucial in a globally competitive market.

LaCruz looks to the future with an open mindset and global vision, embracing international growth and collaboration.

EXTRA CEE

Currently, LaCruz proudly maintains a global presence, with offices, facilities, and strategic partnerships across various regions.

It operates in Europe, Australia, North and South America, and Africa — serving all wine producing markets, as well as

those developing mechanical fruit harvesting (e.g., almonds, oranges, apples, berries and olives). This international network enables LaCruz to provide fast, reliable service to clients worldwide.

A wide range of compatible Made in Italy **spare parts**

LaCruz compatible spare parts are a reliable, tested products at competitive prices. A specialized technical team identifies market needs, develops designs and moulds, and selects the most appropriate materials, to create products whose performance is constantly improved based on market feedback. Ongoing R&D

investment enables future-ready, innovative solutions that meet the highest quality standards.

Modification kit by LaCruz

To further optimize harvesting processes and meet the unique demands of various vineyards, LaCruz offers easy-to-install modification kits. These are designed to enhance harvester performance and ensure high-

quality results. LaCruz's know-how makes it possible to offer a design service for solutions not only for the general market, but also for the specific needs of machinery manufacturers or individual clients.

LaCruz finger weeder

LaCruz is at the forefront of the agricultural machinery sector, offering innovative and high-quality solutions to optimize field operations. The patented finger weeder represent a

revolution in crop management, ensuring effective soil cultivation and improved weed control to adequately meet the needs of increasingly sustainable viticulture.

Patented design

LaCruz weeders feature a unique patented design to maximise weed removal without harming crops.

Applications

Versatile and suitable for vineyards, orchards, and vegetables. The hardness of the weeding fingers can be adjusted based on soil type and crop.

Choose the excellence of a trusted manufacturer

As a leader in high-quality parts and equipment, LaCruz has long been dedicated to the design and production of essential components for branded harvesters and agricultural applications. Each item is made with precision using advanced machinery and moulds. Embossed logos ensure

authenticity and recognition, while the registered LaCruz trademark stands for quality, innovation, and customer satisfaction.

Eco-sustainability

LaCruz is committed to environmental protection through the development of sustainable agricultural equipment. The use of recyclable and biodegradable materials, along with advanced technologies, supports responsible, eco-conscious viticulture.

Innovations

LaCruz's spare parts and kits embody continuous innovation, enabling custom solutions for machinery manufacturers.

Certifications

LaCruz distinguishes itself through product quality, proven by numerous patents-ranging from finger weeders to tying materials like Biofix (certified soil-biodegradable) and LaClip (fully bio-based with no environmental harm).

LaCruz is passionately
committed to enabling
efficient, practical,
and innovative viticulture.

Alternative Parts for Grape Harvesters

A range of parts produced by LaCruz, compatible and adaptable with grape harvesters from the main brands on the market. All spare parts are designed to optimize machine performance, ensuring efficient and uninterrupted harvesting.

Shaking section

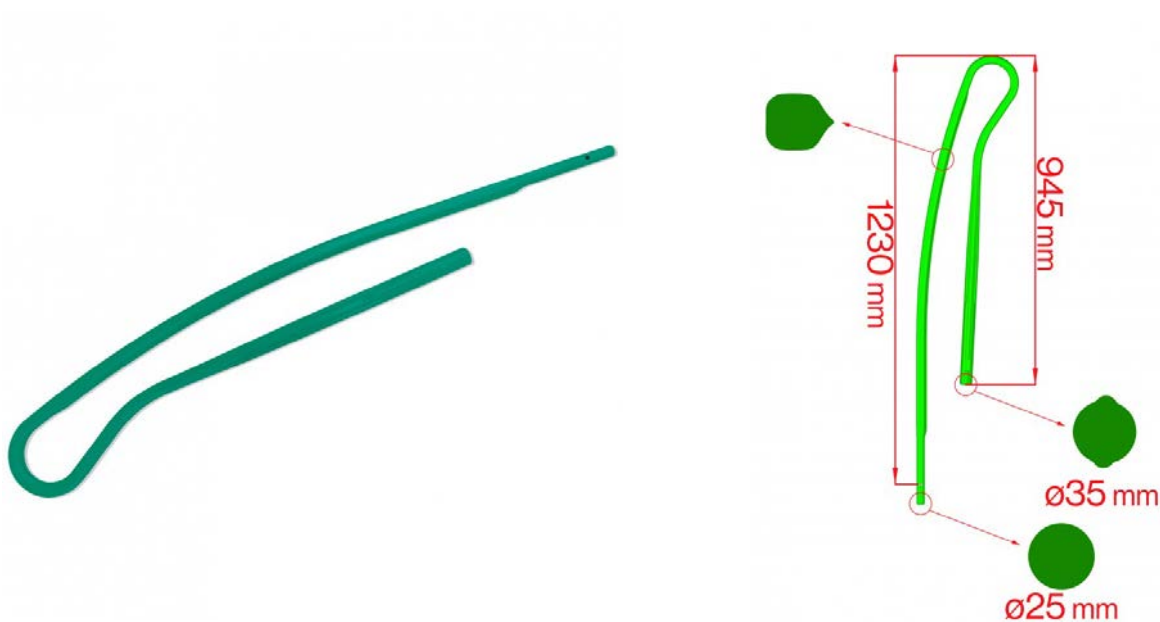

FRG1GRE

LaCruz patented shaking rod for G8, G132, G152, G120, G122, G170 and other models.

LaCruz patented shaking rod for Grégoire grape harvesters are distinguished by an innovative and functional design. Their square-shape form reduces the intensity of crushing during harvesting, contributing to less stress on the plant and gentler harvesting. The improvement in harvesting efficiency results in a faster process with less damage to the vines, preserving the quality of the harvest.

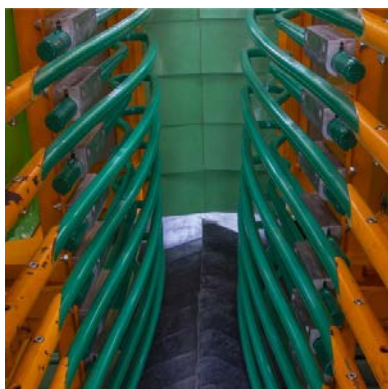

Product box: A box 130 cm x 20 cm x 24 cm.

Qty per box: Contains 10 pcs.

The advantages of the LaCruz shaking rod

The square shape and the reinforcing rib positioned at the back of the shank give greater thickness and durability, improving strength over time. The material composition, made of a special compound and anti-wear additives, ensures superior performance and a long service life. Thanks to their characteristics, these shakers offer excellent value for money.

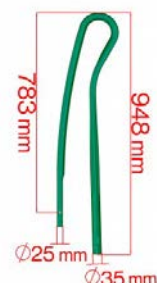

FRS4GRE

LaCruz patented shaking rod for G. PRIMA, G1, G50, G55, G56, G115 and other models. Same length as genuine rod.

Product box: A box 92 cm x 20 cm x 24 cm.

Qty per box: Contains 10 pcs.

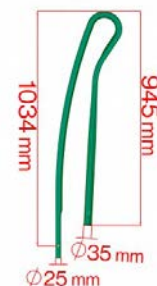

FRO3GRE

LaCruz patented shaking rod for G2, G7, G60, G70, G85, G90, G107 and other models. Same length as genuine rod.

Product box: A box 120 cm x 20 cm x 24 cm.

Qty per box: Contains 10 pcs.

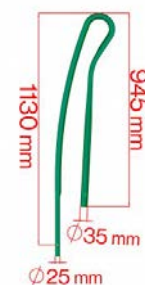

FRP2GRE

LaCruz patented shaking rod for G2, G7, G60, G70, G85, G90, G107 and other models. 15 cm longer than the genuine rod.

Product box: A box 120 cm x 20 cm x 24 cm.

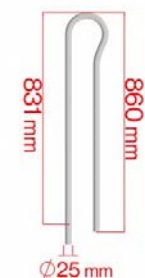

Qty per box: Contains 10 pcs.

FRPMGRE

Original code: 265020

Shaking rod for Grégoire PMM grape harvesters.

Grégoire

Shaking section

FRGLGREG

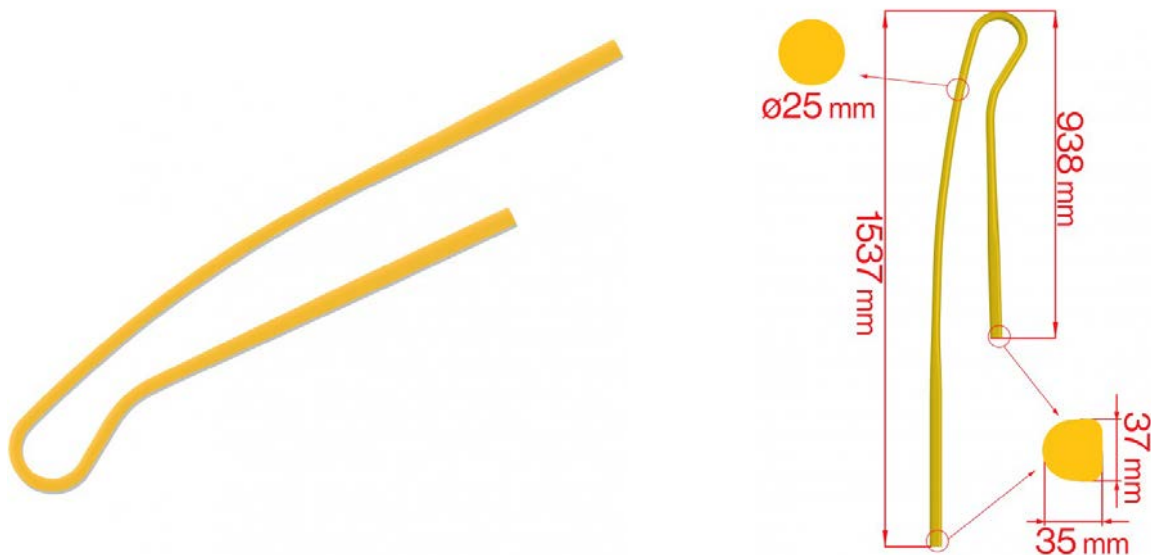

Shaking rod for Grégoire GL7. Yellow.

Original code: 265844, 265843

LaCruz compatible shaking rod for Grégoire model GL grape harvesters are distinguished by their perfect compatibility, faithfully reproducing the shape and characteristics of the original models. The extensive experience in the sector of LaCruz, combined with an in-depth study of materials, has resulted in a wear-resistant compound that guarantees excellent performance even under difficult conditions.

Product box: A box 157 cm x 20 cm x 35 cm.

Qty per box: Contains 10 pcs.

Variants of GL shaking rod

LaCruz compatible shaking rod for Grégoire grape harvesters model GL are available in two variants, namely in the classic standard yellow colour, ideal for use in normal harvesting conditions, and in the black version, designed to withstand higher temperatures and particularly demanding harvesting conditions.

Qty per box: Contains 10 pcs.

FRR8GREG

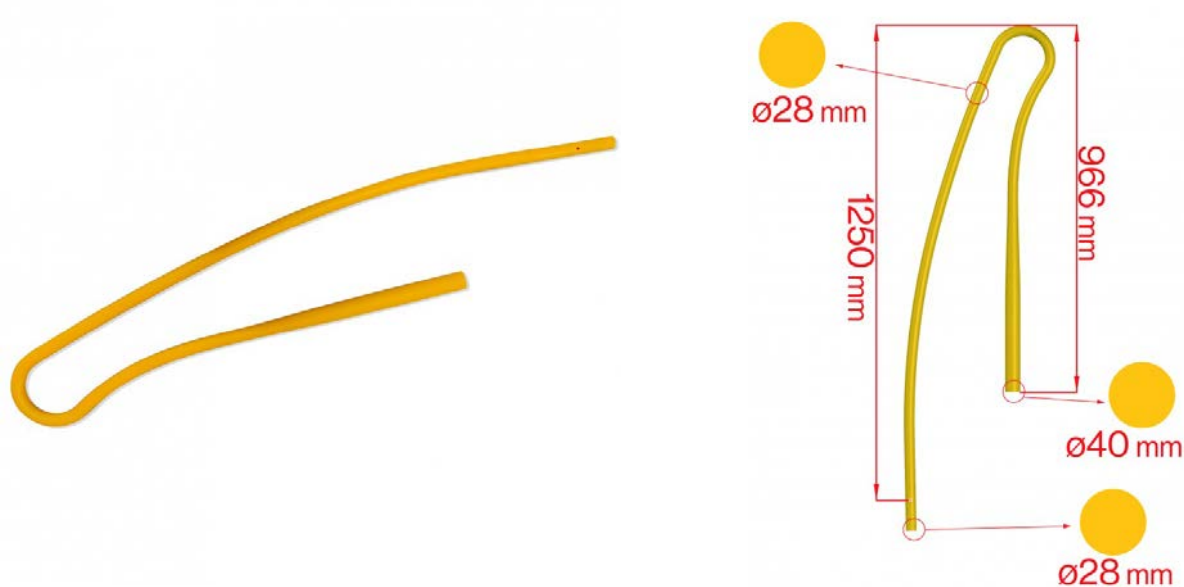

Round shaking rod for Grégoire grape harvesters - Ø 28 mm.

Original code: 265510

LaCruz compatible shaking rod for Grégoire grape harvesters are available in a 28 mm oversized diameter version. The enlarged diameter provides excellent flexibility and increased longevity, features that help optimize yield and durability while minimising maintenance and replacement costs.

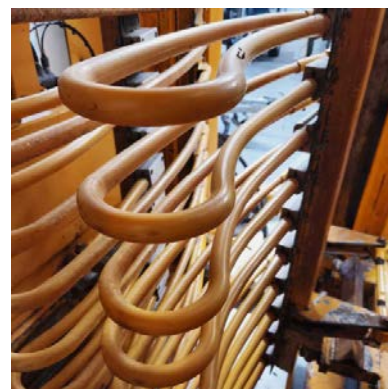

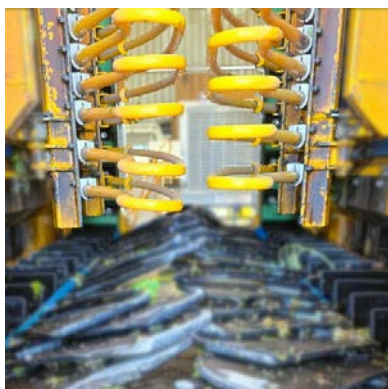

Product box: A box 142 cm x 20 cm x 24 cm.

Qty per box: Contains 10 pcs.

The Advantages of the shaker for olives

The increased diameter ensures greater resistance to wear and mechanical stress, guaranteeing long-term durability. It maximizes efficiency in olive harvesting by making it easier to detach the fruit, even in dense vegetation. This technology leads to significant savings in operating costs by increasing productivity and reducing harvesting times.

Grégoire

Shaking section

FRGRGREG

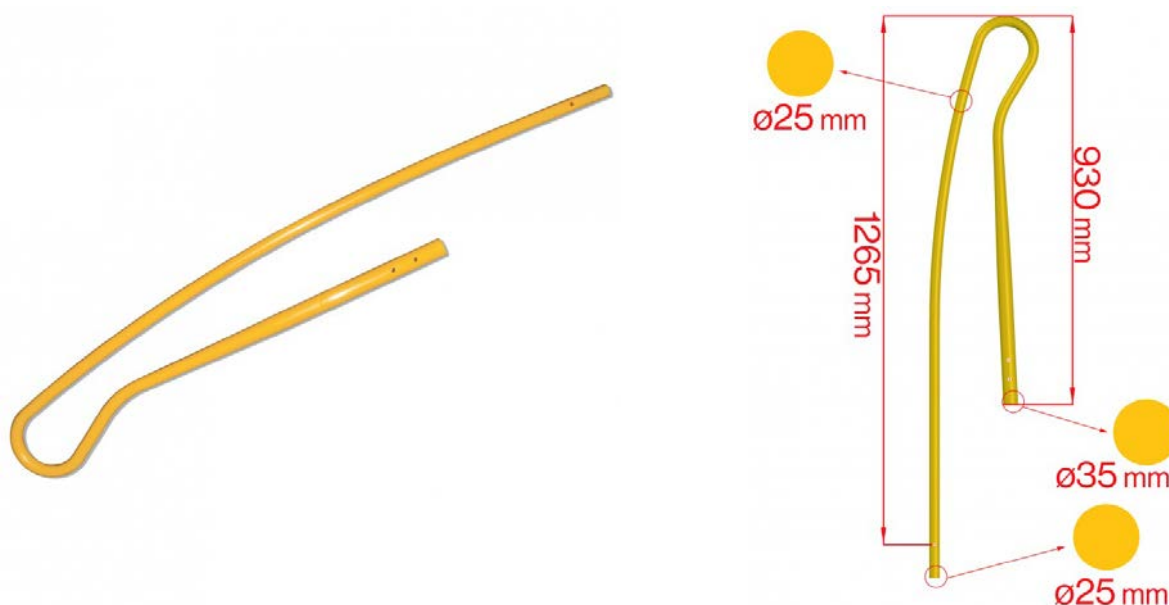

Round shaking rod for G8, G132, G152, G120, G122, G170 and other models. Same length as genuine rod. With holes for quick fixing system. Yellow.

Original code: 265416, 265615, 265617

LaCruz compatible shaking rod for Grégoire grape harvesters are distinguish by perfect compatibility with the originals, offering all the necessary length variants to suit each machine model. Manufactured using an innovative technique and exclusive material, these shakers offer an overall resistance that is comparable to the originals.

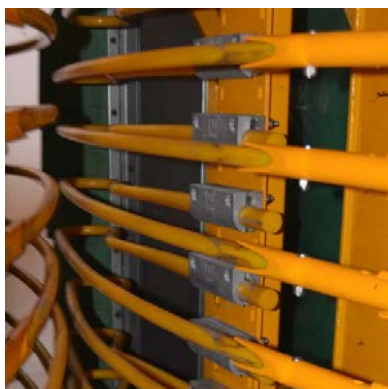

Product box: A box 142 cm x 20 cm x 24 cm.

Qty per box: Contains 10 pcs.

Excellent price-performance ratio

With a combination of durability, reliability and suitability, LaCruz shakers are an ideal choice for those seeking high performance without sacrificing a good value for money compared to original parts.

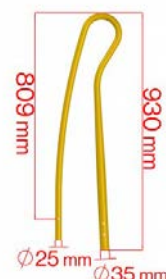

FRSRGREG

Original code: 265566

Round shaking rod for G. PRIMA, G1, G50, G55, G56, G115 and other models. Same length as genuine rod. With holes for quick fixing system. Yellow.

Catcher trays rail

K0020G

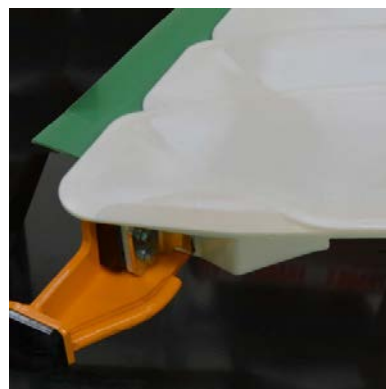

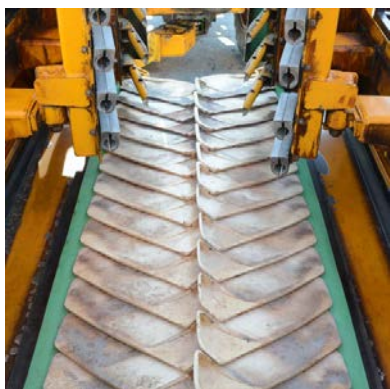

White catcher trays kit. New LC version, for Grégoire grape harvesters

The new catcher tray by LaCruz allows you to modify the original Grégoire ramp to minimize losses during the harvesting phase. It can be installed without requiring any modifications to the original part. The rounded and inclined edge of the paddle facilitates the conveyance of the grapes towards the belts, while the pin on the lower part allows the paddles to interlock with each other, ensuring that they slide over one another without coming apart and allowing for a gentle return onto the stump.

New LaCruz catcher trays

The innovative catcher trays design improves efficiency and optimize the work of the grape harvesters by reducing losses and maximising the harvest.

PUSUGRE

Grégoire upper pulley Ø 300 mm with taper lock Ø 25 mm.

Original code: 280017 (280028 + 230006)

The pulleys produced by LaCruz are made of malleable cast iron to achieve the best balance between product quality and performance during operation. The throat seat is designed to ensure optimal fit with the belt guide to optimise traction and reduce consumption. Installation in the machine is facilitated by the use of the taper lock.

LaCruz pulleys

Pulleys are a key component in harvesting machines, as they perform the task of providing traction and ensuring the correct direction of the conveyor belt during harvesting operations. LaCruz offers a wide range of pulleys designed for optimum performance: realized using the best production techniques, high quality materials and attention to detail, they ensure durability, efficiency and resistance to the most demanding working conditions. LaCruz pulleys are an ideal choice for those seeking reliable and durable components that optimise the operation of grape harvesters and increase the efficiency of harvesting operations.

NA32M1G

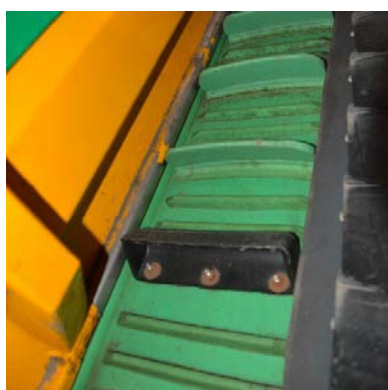

Conveyor belt for Grégoire grape harvesters. Width: 320 mm. Sold by the meter.

LaCruz conveyor belts are manufactured from the highest quality materials. Guides, cross cleats and slats are made with special rubber compounds specially developed by our R&D department to resist wear and ensure excellent working performance and are bonded with special ultrasonic machinery. The fabric with increased transverse rigidity enhances durability and wear resistance and is oil-resistant. The fasteners are made of stainless steel and are fixed with copper rivets.

Details of the LaCruz conveyor belts

LaCruz conveyor belt features rounded cross cleats on the sides and specially designed side guides to resist high friction during dragging and ensure superior abrasion resistance. Each LaCruz belt is marked with a serial number, allowing it to be traced and recognized, providing an additional level of security and guarantee of product quality.

Grégoire

Conveyor belts and canvas

NA32M1GLC

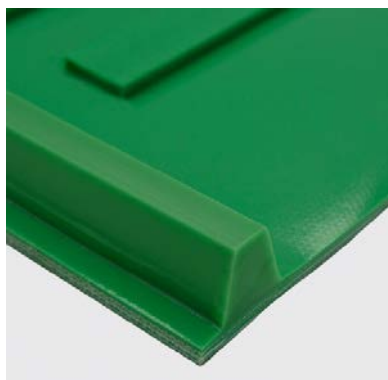

“Light” version conveyor belt for Grégoire grape harvesters. Width: 320 mm. Sold by the meter.

The new “Light” conveyor belt for Grégoire grape harvesters, designed and produced by LaCruz® (320 mm wide, sold by the meter or custom-sized upon request), presents an innovative configuration designed to optimize field efficiency and durability. Its structure stands out for the introduction of lowered structural cleats, which ensure both the rigidity of the belt and the function of leaf removal, facilitating their elimination by the suction system. The overall ergonomics are enhanced by the new design of the cross cleats: their slimmer and lighter structure, together with the optimized shaping thanks to the production technology used, not only makes handling and assembly easier for the operator, but also gently conveys bunches and berries without damaging or crushing them during transport.

Advantages

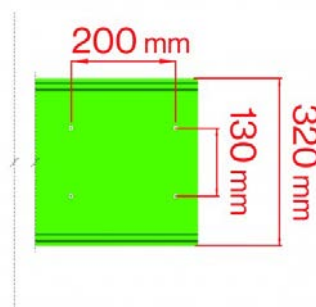

The main advantages of this solution, which significantly reduces the overall weight and friction during operation, are immediate power savings – and consequently fuel savings – as well as reduced wear on mechanical components of the harvester, such as pulleys and belt guides. With the “Light” version, LaCruz offers the same build quality and reliability as always, but at a more competitive price, without compromising harvesting performance and ensuring further savings on the maintenance costs of the entire system.

NA32L1G

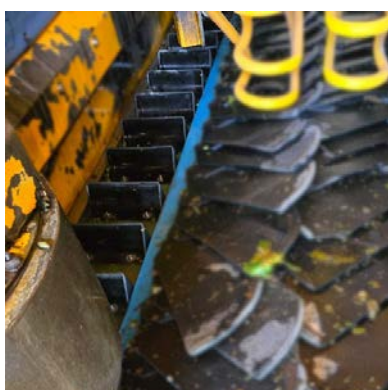

320 mm plain main belt for Grégoire harvesters with holes for fixing buckets. Sold by the meter.

LaCruz offers for machines equipped for grape and olive harvesting, a smooth belt specifically designed to be integrated with harvesting buckets. This belt is available in both standard and reinforced 4-fabric versions, which are suitable for heavy-duty use and provide superior resistance under heavy-duty conditions.

LaCruz conveyor belts Accessories

To complete its offer, LaCruz proposes different versions of buckets, which are compatible with all types of belts and are supplied with related fixing plates. The buckets are made of high-quality plastic material, which ensures excellent technical performance and considerable resistance to wear, increasing the reliability and durability of the collection operations.

harvesters of the following brands

Grégoire

Destemming

A grape sorting system resulting from meticulous research to ensure maximum cleanliness of the harvested grapes while preserving their quality. The exclusive chain system and the innovative design of the destemmer allow rapid drainage of must and berries, bringing only stems, leaves, and shoots into the destemming chamber.

Second-hand machines

LaCruz offers high-quality used grape harvesters and agricultural machinery, supported by expert mechanics, fast after-sales service, and maintenance and repair assistance.

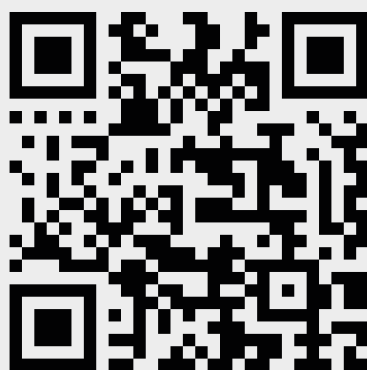

Your **partner** for quality secondhand goods

This sector plays an important role in the agricultural market, especially for companies aiming to optimise costs without compromising the quality of tools and equipment.

Purchasing used equipment from LaCruz means relying on the expertise of skilled mechanics and benefitting from after-sales service and repair support.

Used machine

To view the updated list of used machinery available from LaCruz, scan the QR code with your smartphone or visit the following address:

<https://www.lacruz.eu/shop/usato-macchine/>

or call **+39.0422.209006**

Revamping

An efficient service for the renewal and upgrade of grape harvesters, extending their lifespan and reducing maintenance costs.

Give your grape harvester a longer life with LaCruz's **revamping** service

LaCruz mechanics are dedicated to overhauling and refurbishing used grape harvesters, also upgrading systems with modifications that improve performance and extend operational life.

They also offer annual servicing and reconditioning of harvesters and other machinery for customers who purchased used equipment through LaCruz.

Revamping

For more information about our revamping service, contact us at **+39.0422.209006**
